Btech CSE Core Sec - A

Assignment - 2

- Ques 1. i) Entity relationship diagram
ii) Relational
iii) Object Oriented
iv) Integrity

Ques 2 Data abstraction means hiding complex database details & showing only important information to users. In a healthcare system, it helps doctors, nurses & staff access patients, records easily.

There are 3 levels of data abstraction:

1. Physical level : Describes how data is stored in the database. Users do not interact with this level.
2. Logical level : Defines what data is stored, such as patient details, doctor information and appointment & relation b/w them.
3. View level : Show only required information to different users. Like doctors can see medical history, nurses can see patient details.

Ques 3 Benefits :

- Improve data security & privacy
- Makes the system easy to use for healthcare staff
- Provides data independence, so changes in database structure do not affect users
- Helps in better data management

Challenges :

- Implementation Complexity
- Makes the system easy to use for healthcare staff

- Performance overload
- High development cost
- Security risks
- Training requirements

Section - C

Student (Student_ID (pk), Name, Email, Phone, Department)

Course (Course_ID (pk), Name, Credits, Department)

Attributes (Proff_ID (pk), Name, Department)

Relationship :

1. Student - Enrolls - Course m:m
2. Proff - teaches - Course 1:m
